

Mainboards

There are currently five different [mainboards](#) for the [MEGA65](#):

- the [MEGA65](#) R1 board
- the [MEGA65](#) R2 board
- the [MEGA65](#) R3 board
- the [Nexys A7 100T](#)
- the [MEGAphone](#) board

While the R1, R2 and R3 are pre-series boards that are not being sold freely (yet), the [Nexys A7](#) is an FPGA development board by Digilent that is already available.

The [MEGAphone](#) board is the [mainboard](#) for the planned [MEGAphone](#) (duh).
